

Kitani Islam

Lead Full-Stack Engineer | React, React Native, Node.js & AI Product Delivery

LinkedIn

Email

slmkitani@gmail.com

Background Summary

Lead full-stack engineer with 9+ years of experience building web, mobile, backend, and cloud products across North Africa, Europe, and Asia.

I work across React, Next.js, React Native, Node.js, TypeScript, PostgreSQL, MongoDB, AWS, Supabase, Google Cloud, and AI-assisted product workflows.

I have led development teams, mentored engineers, defined architecture, reviewed code, planned releases, and worked closely with designers, founders, and clients to turn business goals into production-ready software.

My work includes products and delivery for companies and clients such as Trisilco, Otonoco AI, KOHA, Spon.Social, Walmart, TATA, Finimize, Juiceplus, and Adsumnetworks.

Technical Skills highlight

- Frontend: React, Next.js, React Native, TypeScript, JavaScript, Redux, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, GraphQL, Zod, Prisma
- Databases: PostgreSQL, MongoDB, MySQL, Supabase
- Cloud & DevOps: AWS Lambda, EC2, RDS, API Gateway, Supabase, Google Cloud, GitHub Actions, GitLab CI/CD
- Mobile: React Native, Expo, iOS, Android, native modules
- Product Delivery: architecture, release planning, code review, mentoring, client communication, UI/UX collaboration
- AI & Automation: AI product workflows, regulatory monitoring workflows, RAG-style features

Education

Computer Science 2016 - 2020
University of SAAD Dahlab Blida,
Algeria.

Languages

- English (Fluent)
- French (Proficient)
- Arabic (Native)

Experience Summary

Trisilco - Lead Software Engineer

trisilco.com - Kuala Lumpur, Malaysia

Jun 2024 - April 2026

Led the company's shift toward JavaScript-based web and mobile delivery by mentoring .NET/C# developers in React, React Native, Node.js, and TypeScript.

Responsibilities and impact:

- Ran workshops and coding sessions focused on modern JavaScript workflows.
- Helped launch the CheckD Wallet mobile application with Dataswyft.
- Defined project structure, code styling, branching, commits, pull requests, and collaboration workflows.
- Contributed to backend/API optimization, feature delivery, bug fixing, and product improvements.
- Introduced "design for developers" thinking to improve UI quality and usability.

Stack Technologies:

React, React Native, Node.js, Express.js, TypeScript, JavaScript, PostgreSQL, MongoDB, Zod, REST APIs, Stripe, ChatGPT, Gemini, Claude

Otonoco AI - Lead Software Engineer

otonocoai.com - Kuala Lumpur, Malaysia

Sep 2025 - March 2026

Leading a fast-growing Malaysian startup development team building an AI product for regulatory monitoring in banking and insurance.

Responsibilities and impact:

- Define technical direction and make product architecture decisions.
- Plan releases, assign tasks, clarify ownership, and keep delivery moving.
- Work side-by-side with designers to improve UI/UX and convert feedback into engineering priorities.
- Build across frontend, mobile, backend, cloud, and AI-assisted workflows.
- Translate user feedback into clear "to-build" and "not-to-build" product decisions.

Stack Technologies:

ChatGPT, Gemini, Google Cloud, AI, Next.js, React.js, React Native, Node.js, Express.js, Zod, PostgreSQL, JavaScript, TypeScript, Python, Gemini

KOHA - Lead Software Engineer

koha.digital - Kuala Lumpur, Malaysia

Jun 2024 - Aug 2025

Led development delivery for KOHA products, including a React Native mobile application focused on client acquisition, onboarding, and service access.

Responsibilities and impact:

- Led feature delivery across mobile, web, backend, and APIs.
- Improved existing web platform features and resolved production issues.
- Optimized backend APIs and improved data access patterns.
- Implemented authorization and improved data security.
- Created and assigned tasks, reviewed code, and supported delivery planning.
- Worked with the product/design side to improve user flows and reduce friction.

Stack Technologies:

React.js, React Native, Node.js, Express.js, Zod, PostgreSql, MongoDB, JavaScript, TypeScript, Rest API's, ChatGPT, Gemini, Stripe, Azure.

Antler (MY2) - Co-founder

Spon.Social - Kuala Lumpur Malaysia (onSite)

April 2024 - May 2024

Joined Antler's MY2 founder residency while building Spon.Social, a social discovery product for outdoor activities, local events, and community-driven experiences.

Responsibilities and impact:

- Validated product direction during a 6-week pre-seed program.
- Tested a business model around local communities, events, and merchant traffic.
- Worked on product positioning, user flows, and early-stage investor evaluation.
- Reached a valuation discussion around USD 1M, but did not secure investment due to monetization challenges in the social app model.

Spon - CTO

Spon.Social - Bangkok Thailand (hybrid)

Feb 2024 - Jul 2024

Co-founded a social app designed to match people by location and interests for outdoor activities, local events, and community-hosted experiences.

Responsibilities and impact:

- Designed and optimized the PostgreSQL relational database.
- Built secure and scalable backend services.
- Deployed backend infrastructure on Supabase.
- Built and optimized the React Native mobile application.
- Designed a fast 60-second user experience to connect nearby users around activities.
- Worked across product, UX, backend, mobile, and technical planning.

Stack Technologies:

React Native, Next.JS, Github, TypeScript, PostgreSQL, Supabase, Real-time Messaging

Consulting Senior Full Stack Developer

Trienpont International - Bangkok Thailand (onSite)

Mar 2023 - Jul 2023

Led and mentored a junior development team through full-stack product delivery.

Responsibilities and impact:

- Selected technologies based on project requirements.
- Paired with junior developers and supported their full-stack learning.
- Set up project architecture, backend structure, and development workflow.
- Designed and optimized relational databases.
- Built mobile applications using React Native.
- Defined deployment, branching, commit, and review workflows.
- Reviewed code and worked closely with designers to improve UI/UX quality.

Stack Technologies:

*React Native, React, Next.js, Github, TypeScript, Supabase, Jira, UX, Next.js
PostgreSQL*

Fullstack React/React Native Developer

RiverDone digital - United Kingdom (remote)

Aug 2021 - Mar 2023

Worked with a UK-based development agency supporting clients including **Walmart**, **TATA**, **Finimize**, **Juiceplus**, and other companies across the UK and USA.

Responsibilities and impact:

- Built React and React Native applications from the ground up.
- Refactored React Native codebases and improved app performance.
- Debugged and resolved production issues across web and mobile apps.
- Implemented new product features and client-requested improvements.
- Set up GitHub/GitLab CI/CD pipelines and automation workflows.
- Integrated native React Native modules, including OpenCV for image processing.
- Supported project planning, resource management, and technical delivery.

Stack Technologies:

React, React Native, Redux, React Router, Native Modules, Expo, Supabase, MySQL, Git, Github, Gitlab, Gitlab CI/CD, OpenCV, IOS, Android, Bash, REST API, GraphQL, tailwindcss, CSS, SCSS, Styled Components, TypeScript, JavaScript, Adobe Analytics.

Frontend Developer

Nexus Digital Solutions - Algeria (onSite)

Jun 2020 - Jul 2021

Worked on an Uber-like platform and led web frontend delivery.

Responsibilities and impact:

- Led the web development team.
- Managed web project delivery and frontend planning.
- Helped define API structures with backend/mobile teams.
- Worked with designers to improve UI/UX. • Built shared features with the mobile team.
- Turned client ideas into technical requirements.
- Set up automation workflows including Docker, CI/CD, GitHub, and Heroku.

Stack Technologies:

Vue.JS, Nuxt.JS, Heroku, Git, Github, Gitlab, Gitlab CI/CD, CSS, JavaScript, Native Base, REST API.

Frontend Developer

Glitnir Forseti - Algeria

Oct 2019 - Mar 2020

Supported a blockchain/fintech startup by accelerating frontend delivery and backend integration.

Responsibilities and impact:

- Integrated backend services with frontend applications.
- Integrated third-party APIs including BitMEX and Binance.
- Refactored frontend code and improved maintainability.
- Supported delivery across trading, blockchain, and fintech-related product features.

Stack Technologies:

Blockchain, Fin-tech, React, Git, Github, CSS, Styled Components, JavaScript, Native Base, Bitmex, binance, REST API, GraphQL

R&D Full Stack Developer

Adsumnetworks - United Kingdom (remote)

Dec 2017 - Jan 2020

Worked as part of an IoT startup in intelligent transportation systems, experimenting with BLE, sensors, cloud services, and web/mobile monitoring tools to solve parking detection problems in large cities. The project was recognized by Catapult Network UK.

Responsibilities and impact:

- Led software development across cloud, web, mobile, APIs, and data storage.
- Designed AWS service architecture.
- Designed relational database architecture and storage flows.
- Built REST and GraphQL API endpoints for sensor health monitoring and real-time data access.
- Worked with embedded systems engineers during on-site parking lot testing.
- Helped process magnetic-signature sensor data to distinguish vehicles from environmental noise.
- Built mobile and web applications for showcases, internal monitoring, and data visualization.
- Worked directly with clients to stream real-time and on-demand data.

Stack Technologies:

BLE, AWS, AWS Lambda, AWS RDS, AWS API Gateway, AWS IOT Core, AWS EC2, AWS Console, React, React Native, VueJS, React Router, Redux, Native Modules, IOS, Android, Expo, REST API, GraphQL, JavaScript, TypeScript, C, Bash, Linux, MySQL, Git, Github, Gitlab, Gitlab CI/CD, OpenCV, Bash, Tailwindcss, CSS, SCSS, Styled Components.
